SlowCOVIDNC

SLOW THE SPREAD OF COVID-19 ON CAMPUS
JUST BY USING YOUR PHONE

SlowCOVIDNC allows users to be notified if they may have been in close contact with someone who has shared a positive COVID-19 test result through the app. Users can anonymously share a positive COVID-19 test result to notify others of exposure and help slow the spread of COVID-19.

Why should you download SlowCOVIDNC?

- It won't cost you a dime!
- It doesn't collect personally identifiable or location information.
- It keeps your battery charged and data use low by only using Bluetooth.
- It's 100% voluntary to download, use, and submit any information.
- It can help keep your campus safe and protect your friends and family.

Download SlowCOVIDNC to slow the spread.
